I am a Website Developer, Software Developer, and AI Engineer based in Johnson City, Tennessee, with over six years of experience building and managing websites. I use AI tools such as Claude Code, Claude Design, and Codex to build software applications backed by Supabase and deployed on Vercel. I find creative and technical solutions to ensure client and company success. I take projects from concept to launch with strong problem-solving, communication, and project management skills. In 2026, I developed FollowThrough, a subscription platform for small businesses and nonprofits that combines CRM, event, sales, project, and marketing management with meeting transcription. I am seeking website development, software development, or AI engineering work that will help companies achieve their goals and allow me to grow as a developer.

<> SKILLS

- React.js
- Next.js
- PHP

- Constant Contact/Mailchimp
- Public Speaking
- Writing/Editing
- Notion
- Teaching/Training
- Project Management

PROFESSIONAL EXPERIENCE

Ergon Insights

AUGUST 2026 - PRESENT

Website Developer and AI Engineer Contractor

- Maintain and extend a customer-facing AI chatbot that answers user questions in a community forum, integrated through an LLM API.
- Review frontend and backend code across client websites, diagnosing and fixing usability issues on a Supabase and Vercel stack.
- Use Claude Code to build new features, debug, and review code across active client projects, verifying generated changes against existing patterns before merging them into production codebases.

Creative diSPersion

AUGUST 2026 - PRESENT

Co-Founder | Software Engineer | Website Developer

- Design and develop custom apps using Next.js with Claude Code, Codex, and Claude Design.
- Manage customer relationships to increase product growth and contribute to marketing initiatives.
- Identify products and projects for development.

FollowThrough

JUNE 2026 - PRESENT

Software Developer | AI Engineer

- Developed FollowThrough, a subscription platform giving small businesses and nonprofits CRM, event, sales, project, and marketing management in one product, built with Next.js, Supabase, and Vercel.
- Took the product from concept to launch in three months as a solo developer, using Claude Code, Claude Design, and Codex for design, implementation, and code review.
- Implemented tenant isolation via Supabase row-level security and role-based access control to protect client CRM and meeting data.
- Built an in-app ticket system for subscribers to report, track, and resolve issues.
- Engineered an Anthropic API pipeline that summarizes meetings, extracts decisions and action items, assigns tasks to projects, and updates attendee CRM records.

EDUCATION

American University

- Master of Public Administration
- Women, Policy, and Political Leadership Graduate Certificate
- Campaign Management Institute
- WeLEAD Graduate

East Tennessee State University

- Bachelor of Science
- Leadership Studies Minor

- **Developed** a subscription based software for small businesses and nonprofits
- **Completed** the NaNoWriMo challenge 4 times and have written 8 books.
- **Launched** 5 businesses: software development (2), website design, public speaking, writing/editing

BOARDS

- Tennessee Equality Project (2024 - Present)
- Create Appalachia (2014 - 2015 and 2018 - 2019)

Kate Craig Consulting

MARCH 2025 - PRESENT

Owner | Website Developer

- Design and develop custom WordPress websites, including WooCommerce, that are mobile responsive and optimized for SEO.
- Manage an ongoing client relationship including site maintenance, content updates, new page design, and landing pages built for conferences and events.
- Provide digital marketing services including social media management, email marketing, and graphic design for an ongoing client.

McClaskey Excellence Institute

JULY 2022 - JULY 2025

Director of Marketing & Customer Relations

- Managed and maintained the organization's WordPress website, designing new pages, building event landing pages, and editing content to keep the site current and engaging.
- Contributed to a 36% increase in page visits over three years through consistent website improvements and integrated digital marketing efforts.
- Designed marketing materials including flyers and printed collateral using Canva, maintaining brand consistency across all channels.
- Created and sent marketing emails for events, achieving an average open rate of 35%.
- Created content and managed social media channels to support audience growth and event promotion.
- Edited client testimonials and marketing videos to support promotional campaigns.
- Delivered consistent results that led to an ongoing consulting relationship through Kate Craig Consulting.

Harvesting Democracy PAC and Consulting LLC

APRIL 2023 - PRESENT

Founder

(Consulting LLC closed December 2024)

- Design, develop, and manage custom WordPress websites for both the PAC and the LLC, ensuring each site is mobile-friendly.
- Provide digital marketing and website advice to PAC-endorsed candidates.
- Lead strategic sessions for PAC-endorsed candidates, providing ongoing consulting and support throughout their campaigns.

Washington County Democratic Party

MARCH 2017 - MAY 2021

Chair

- Oversaw the hiring and project management of a freelance developer to design and launch the party website, then managed and maintained the site independently with near-weekly updates including events, blog posts, and election and candidate content.
- Grew social media engagement by over 300% and increased fundraising by over 1,000% over a 4-year period through targeted content creation, donor outreach, and grassroots fundraising efforts.
- Recruited candidates to run for office, resulting in the first Democrat elected to the Washington County Commission.
