

KATE CRAIG

— FRONT END DEVELOPER

PROFILE

I am a Front End Developer based in Johnson City, Tennessee with over five years of experience building and managing websites. I bring a creative eye and a technical mind to every project. After years of creating WordPress sites and teaching myself HTML and CSS, I formalized and strengthened my command of those skills in 2025, expanding my toolkit to include JavaScript, Bootstrap, Python, SQL, and more. My background in political organizing and campaign management brings strong communication and project management skills to every team I join. I specialize in building mobile-friendly, accessible, SEO/AEO/GEO optimized websites that balance strong visual design with a seamless user experience (UX). I am actively seeking full-time front end development roles and I thrive in environments where the work is meaningful and community-focused.
